Master of Science in Experimental Biomedical Research 2017/2018

Common courses:
- Models for human diseases
- Infection, Inflammation and cancer
- CNS regeneration and repair
- Microscopy for life sciences
- Quantitative research methods
- Scientific writing

Semester 1:
- Specific courses

Semesters 2-3:
- Master thesis
  - 1 Year
- Thesis-related activities (seminars, j. clubs)

Options:
- Neuroscience
- Cardiovascular Metabolic health
- Infection Inflammation Cancer

ECTS:
- 18
- 12
- 45
- 15
