Why study Clinical Psychology in Fribourg?

**Individual tutoring and small groups**
In Fribourg, you study in small groups with direct, quick and privileged contact to supervisors.

**Internationality**
Fribourg is a bilingual University, with students and supervisors from many different countries. Faculty taught courses are complemented by lectures from international guest faculty. The common study languages are French, German and English.

**Support for future academic and clinical careers**
We support our students in their academic or clinical career path beyond the Master (e.g., advice, networking, access to clinical experience in outpatient clinic under psychotherapeutic supervision, PhD).

http://psychologie.cuso.ch/

**Convivial atmosphere**
Last but not least, you will enjoy the convivial study atmosphere among students and with supervisors and faculty.

Just a step away from major urban centers of both German and French speaking Switzerland, you will enjoy access to the cultural and social life of both regions.

Master in Psychology, Clinical and Health Psychology

**Each of the following modules is validated with 15 ECTS:**

**Psychopathology in Clinical and Health Psychology**
Topical courses on evidence-based knowledge of etiology and treatment of mental disorders

**Specific topics and diagnostic skills in Clinical and Health Psychology**
Specialized lectures in Clinical Child and Adolescent Psychology, Family Psychology, Behavioral Genetics and Psychosomatics. Training in diagnostics in Clinical and Health Psychology

**Methods and Intervention**
Application and implementation focused courses on the scientific backgrounds and basic strategies of preventive and psychotherapeutic interventions.

**Complementary knowledge from an optional module offered in Fribourg** including Development and School Psychology, Cognitive Neurosciences or Work & Organizational Psychology.

**Master project and thesis**
Students actively conduct and document their own research study, embedded in ongoing research projects and under supervision by members of the research groups.

**Clinical internship or Lab involvement**
Students actively participate and gain experience in clinical practice or research under permanent guidance and supervision.

**The Master program prepares for postgraduate training**
We tailor our program to the requirements of further education and training, and are involved in existing and upcoming postgraduate programs for Psychotherapy (www.avkj.ch; www.formation-continue-unil-epfl.ch/specialisation-psychotherapie-comportementale-cognitive-das), Clinical Psychology and Health Psychology (http://www.unifr.ch/psycho/mas-psychosante/fr).
