Foundations in Psychology (15 ECTS)
General lectures covering elementary areas in psychology.

Developmental Psychology (15 ECTS)
Modern theories of typical development. Atypical development (e.g., blind-, preterm-children, dyspraxia)

School Psychology (15 ECTS)

Internship or Lab rotation (15 ECTS)
Students gain experience in practice or conduct experiments in research labs

Master project and thesis (30 ECTS)
Research project elaborated, conducted and analyzed by master students with individual supervision. Supervision could be in French, German, or English

Two options for specialization:
A: Clinical psychology (15 or 30 ECTS)
Psychopathology, Diagnosis, Intervention

B: Neuroscience (15 or 30 ECTS)
Cognitive, affective and social neuroscience, Methods (EEG, fMRI, ERPs)

The program is mostly in French. Some courses in English. Begin in autumn or spring semester possible.

Why study in Fribourg?

Individual supervision and small groups
In Fribourg, you can study in small groups with direct, quick and privileged contact to supervisors.

Internationality
Fribourg is a bilingual University, with speakers and students coming from many different countries. The common language is English.

High flexibility
In addition to the compulsory lectures, we allow students to pursue and realize self-chosen study directions.

Support for future careers
We support our students in their career path after the Master (e.g., advice, contacts, recommendations).

Convivial atmosphere
Last but not least, you will enjoy the convivial study atmosphere among students as well as with your supervisors.
