Attention is not just a necessary capacity of the mind. It is both a means to experience the world and a virtue in how we deal with other people. Hence, beyond the standard notion of attention as 'focused attention', there are other forms of attention, such as divided attention, full attention, attentiveness, aesthetic and ethical attention. In this workshop we will take a closer look at some of these other forms of attention and their relation to affordances, aesthetic experience, and inattention.
