The Chair for Industrial Economics is looking to hire a

Research Assistant (50-100%)

The position is available from **1 December 2026**, or by a jointly agreed date.

The successful applicant will primarily support the chair's research activities. Responsibilities are varied and will be assigned according to the applicant's skills and experience. They may include:

- Conducting and supervising experiments
- Managing the frilab mailbox and participant database
- Programming experiments in Python
- Preparing data in R or Python

Applicants should be enrolled in a Bachelor's or Master's programme in economics, business administration, business informatics or computer science and have a good academic record. A good knowledge of German and/or French is advantageous and a good knowledge of English is desirable.

The workload is **5.5 to 11 hours per week**, corresponding to an appointment of 50% to 100%, depending on the agreement. The appointment is for up to **six months**, ending no later than **31 May 2027**.

To apply, please send a short cover letter, your CV and a current transcript of records to Melvin Marti, melvin.marti@unifr.ch by **5 November 2026**.

For any questions about the position, please also contact Melvin Marti, melvin.marti@unifr.ch.
