Publication Series of the Medieval Institute at the University of Fribourg, Switzerland

Guidelines for Manuscript Preparation

We request that authors please format their manuscripts following these guidelines and submit the electronic files on CD-Rom or via e-mail. The Medieval Institute uses these electronic files submitted by authors as the basis for the actual print files for publication. In order to facilitate the editorial process, we also request a print copy of the text. The digital version and the printed text submitted must be identical.

Maximum Length: 120,000 Characters, including cited texts, footnotes and spaces.

Title: Before the main text please include the title of the article (without any special formatting), the name of the author and, in parentheses, the author's home institution. Top-level section headings should be numbered using Roman numerals, sub-headings using Arabic numerals (I. 2.3).

Formatting: The text must be formatted for continuous scrolling (without forced page breaks). Neither absolute justification nor line-end hyphenation should be used, and indents should not be made using tabs. Please do not add headers or footers, unusual letter spacing, or words in all-caps.

Citations: In the main text, quotes should be enclosed in double quotation marks (" "), citations within citations in single quotation marks (' '). The titles of works, as well as any words that need to be set off because the author is using in an unusual way, should be enclosed in single quotation marks. Excisions from quotations should be indicated using three periods enclosed in square brackets [...]. Comments or explanations added by the author within quotations should also be enclosed in square brackets. All quotes in Latin, Old French, Middle High German etc. in the main text should be rendered in italics, without quotation marks. Line breaks in verse quotations (if not rendered using line returns) should be indicated using a forward slash (/). Longer quotes (more than three lines) should be rendered in standard type, which should be indented (0.4 cm/0.16 in) from the left margin of the main text.

Footnotes: Footnotes are indicated in the text by automatically generated superscript numbers. These fall *after* the punctuation mark if they refer to the entire sentence or phrase, *before* the punctuation mark if they refer to the individual word or portion of a sentence that immediately precedes them. All note texts should begin with a capital letter and end with a period. The use of common abbreviations such as "See also", "cf.", "ibid", etc. is allowed. Complete bibliographic information should be provided in the first reference to a particular title; additional references may be given in the following shortened form: Author (note 3), p. 33.

Citation Format in Footnotes: Please observe: Write out the first names of authors when possible. Where applicable, the location of the publisher should be repeated in the language of the country where it is located.
