

## Examiner's Report Form

As an examiner for a doctoral thesis at the Faculty of Science and Medicine of the University of Fribourg, we ask you to return this form accompanied by a detailed report (2-3 pages) to the Dean's office.

Please summarize the research work and thesis produced by the PhD candidate and evaluate the scientific quality and impact in the specific discipline. Does the presentation correspond to the international standards in the discipline?

If the thesis is based on multi-authored papers, can you evaluate the contribution of the PhD candidate?

### Examiner

*Family name*

*First Name*

*University*

### Candidate

*Family name*

*First Name*

*PhD in*

According to your evaluation, you recommend that the thesis be:

- ☐ Accepted  
☐ Accepted on the condition of corrections (please specify within your report)  
☐ Rejected

A thesis that is rejected can be submitted a second time. If after the second submission the thesis is rejected again, the candidate will be definitely excluded from PhD studies at the Faculty of Science and Medicine.

The best thesis of the year will be honoured by a Faculty prize. Do you consider that this thesis belongs to the 10% of the best theses presented recently in your domain and would therefore merit such a prize?

- ☐ Yes      ☐ No

If yes, why?

Date: \_\_\_\_\_

Signature: \_\_\_\_\_

**Please fill out this form and send it with your detailed report (2 to 3 pages) in due time**

**by postal mail to this address**

**or**

**electronically to**
