

REGISTRATION FOR THE MASTER FOR GRADUATES OF THE UNIVERSITY OF FRIBOURG

A. Graduates of the Faculty of Science and Medicine

Once you have acquired your Bachelor's degree from the Faculty of Science and Medicine, your registration for the Master's degree is made directly by the Attestation Office.

You should **neither** register for a Master's degree via the Office for Admissions and Registration, **nor** request a change of study programme via your MyUniFR student portal.

Consecutive Master

If you wish to continue your studies with a consecutive Master's degree (for example, you are finishing your BSc in Mathematics and wish to do the master in Mathematics) you will **automatically be registered for the consecutive Master** by the Attestation Office, as long as you do not exmatriculate.

- You will receive an email from attestations-scimed@unifr.ch asking you to confirm your Master's programme or to choose an option **if multiple options are available**.

Non-consecutive Master

If you are finishing your Bachelor's degree at the Faculty of Science and Medicine and wish to do a **different Master** at the Faculty (for example, you are finishing a BSc in Mathematics and wish to do a Master's degree in Environmental Science and Humanities):

- Read the **Curriculum** of the Master you are interested in to check the conditions for admission. The minors that you completed during your Bachelor are taken into account here. If necessary, contact the study advisor of the Master.
- If you meet the conditions for direct admission listed in the curriculum, send an email to attestations-scimed@unifr.ch indicating the Master you wish to choose.
- If you do not meet the conditions for direct admission, send an application with a complete file to the [Student's requests commission](#). The Commission will determine which prerequisites (e.g. credits to be made up) will be required of you. It is advisable to anticipate your application a little so as not to lose time at the end of your bachelor's degree.
- If you accept the prerequisites that were decided by the commission, confirm it to request-scimed@unifr.ch who will register you in your new programme (either directly into the Master, into a prerequisite programme or into a complementary programme).

B. Graduates of other Faculties of the University of Fribourg

If you are finishing your Bachelor's degree at another Faculty and wish to do a Master's degree at the Faculty of Science and Medicine (e.g. you are finishing a Bachelor's degree in Law and wish to do a Master's degree in Environmental Sciences and Humanities):

- Read the **Curriculum** of the Master you are interested in to check the conditions for admission. The minors that you completed during your Bachelor are taken into account here. If necessary, contact the study advisor of the Master.
- Request a **change of study programme on MyUniFR** and indicate the semester in which you wish to start the Master.

- Depending on your previous studies and the requirements of the curriculum, you will also have to apply to the [Student's requests commission](#). The Commission will determine which prerequisites (e.g. credits to be made up) will be required of you. It is advisable to anticipate your application a little so as not to lose time at the end of your bachelor's degree.
- If you accept the prerequisites that were decided by the commission, confirm it to request-scimed@unifr.ch who will register you in your new programme (either directly into the Master, into a prerequisite programme or into a complementary programme).
