## Ph. D. position (100%): Microeconomics in Fribourg

We are looking for a candidate with a strong interest in microeconomics, in particular in the fields of network science, industrial organization, behavioral economics, managerial economics, or game theory. The position will be part of the chair of *Applied Microeconomics and Business Economics*, which belongs to the Department of Economics of the University of Fribourg in Switzerland.

The successful candidate has a strong background in microeconomic (or mathematical) methods, a strong motivation to conduct own research, and the ability to teach exercise tutorials that motivate students. The largest part of the working time (more than 50%) is devoted to conducting own research and to receiving doctoral training. In addition, supporting the chair in teaching, research-related and administrative tasks is part of this full-time position (100%). The attractive salary remunerates the 100% degree of employment. Participation in international conferences or in doctoral courses, e.g., at the study center Gerzensee ([www.szgerzensee.ch](http://www.szgerzensee.ch)) is encouraged and additionally supported.

Applicants should hold a degree in economics or a related field (including mathematics, sociology, and management), preferably with a specialization in microeconomics. An overall grade of 5.0 according to the Swiss grading system for the Master's program is generally a minimum requirement. A good command of both English and German is necessary. The University of Fribourg offers attractive working conditions in an international environment.

We aim to fill the position by September 1<sup>st</sup>, 2024.

Interested candidates are asked to send their application in a single file named [Lastname].pdf by email to [karin.loetscher@unifr.ch](mailto:karin.loetscher@unifr.ch) using "Application PhD-Micro-2024" in the subject line. An application consists of a letter of motivation, the CV, the transcripts (including all grades from the Master's and Bachelor's program), and the email address of at least one referee who is ready to submit a letter of reference upon request.

Review of applications will begin on **May 13<sup>th</sup>, 2024**, and continue until the position is filled.

For further information please contact Prof. Dr. Berno Buechel via email.
